

VORTX FAMILY OF AIR FILTRATION SYSTEMS

CLEANSE THE AIR IN A 10 X 10 X 10 FOOT ROOM IN LESS THAN 2 MINUTES

Ventilation and air filtration are important to reduce the spread of any infection, but especially so with COVID-19. The Vortex Air Cleansing (VAC) product family can be an important part of reducing the virus spread.

- The VAC family includes models for desktop/tabletop, full room, ceiling mount, and targeted, spot air filtration applications.
- The systems support either one or two high-efficiency particulate air filters (HEPA, MERV 13 rated).
- MERV-13 rated filters are recommended by the CDC to clear the air of viruses, including SARS-CoV-2 (COVID-19), and other allergens.
