

# LGA COOLING

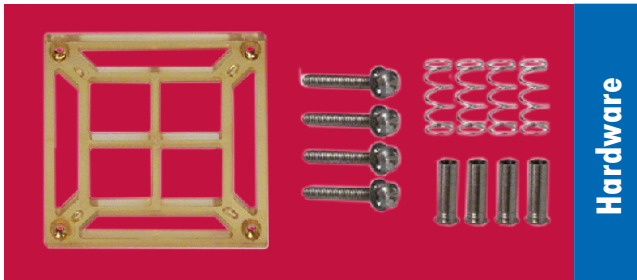

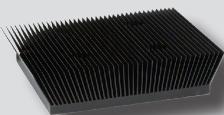

Active Cooling

thermal resistance as low as

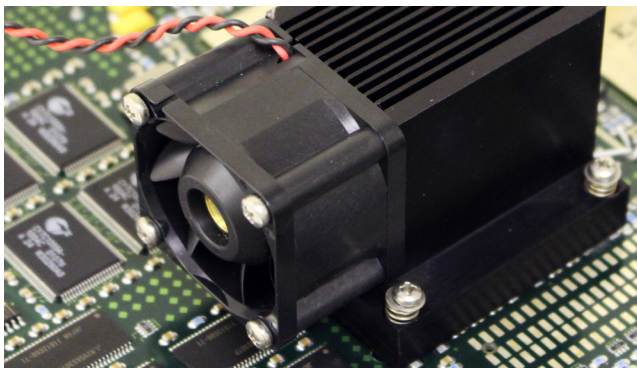

**0.51°C/W**

Passive Cooling

Hardware

- Designed for high-power LGA applications such as Freescale and Intel processors
- Active and passive cooling solutions available
- Thermal resistance of 0.51°C/W or lower with custom design
- Unique attachment minimizes mechanical stress on the device
- Includes spring-loaded, push pin mounts for direct attachment to the PCB
